Technology at work for you

CONNECTING YOUR BUSINESS TO THE TECHNOLOGY RESOURCES YOU NEED

UniTech can help you develop a better insight into your business, allowing you to make the right decisions for the future. Just deploying IT is no longer good enough, at UniTech it's more than IT, it's about doing business better, faster, more efficiently, responding flexibly to the demands of business, informing decision makers and releasing the hidden value in your information assets. We free business from the shackles of legacy technology and reengineer underperforming IT investments.

As a true strategic partner to your business, UniTech is focused on helping you to meet your business objectives and strategic goals by getting the best out of IT. Our aim is to provide our clients with business centric IT guidance, fulfillment, support and backup when they need it, where they need it. Working together as an extension and complement to existing IT teams and agencies or as a fully service orientated IT outsourcing partnership looking after all your business IT needs. Allowing you to focus on what you do best and we do the rest.

How do we do it – with our background from a wider business spectrum we connect people, processes and information and contribute value to your business with the added benefit of service level guarantees for complete peace of mind. We work closely with our clients to deliver cost effective, bespoke IT solutions that support their business including the following services:

- Custom Software Development
- Collaboration and mobile always on services
- Hosting – Software + Service
- Business Intelligence
- Business Process Engineering
- Data Management Solution
- Security & Compliance auditing

ENTERPRISE INFORMATION MANAGEMENT

Ensuring information flows easily and securely around your organization UniTech harnesses the Microsoft SharePoint platform as the foundation for information management in the enterprise.

TECHNOLOGY CONSULTING PROVIDING A TOTAL END TO END SOLUTION.

SOFTWARE DEVELOPMENT

At UniTech we develop high quality software to address your individual requirements.

Bespoke operation scenarios have provided greater exposure to the diversity of challenges in the marketplace compared with 'packaged' solution providers. Our expertise is backed up with qualified operational personnel, in their particular disciplines, experienced in live deployments and PRINCE 2 project management.

Microsoft .NET framework - Microsoft Certified developers develop for ASP.NET, Windows Forms and Web Services platforms using both C# and VB.NET.

Microsoft SQL Server - Design & implementation of databases delivering high performance & reliability; reporting services and Business Intelligence.

Adobe - Fully Certified, ColdFusion & Advanced ColdFusion developers deliver the latest in Macromedia and Flash technology applications & projects.

Sitecore - Customisation & implementation of Sitecore CMS software delivering strategic content management solutions; integrating with Microsoft .NET & SharePoint 2007.

BUSINESS PROCESS ENGINEERING

Through structured, multi-day Value and or Deployment planning engagements, UniTech works with clients to identify, design, and implement improvements to business process and new initiatives. A process providing clients with solutions to real business problems.

SECURITY SOLUTIONS

UniTech's 'Cordon Sanitaire' security solution provides the Consulting, Technical, Educational and Support Services required to meet today's security challenges.
